

TIM BURD SMNG A

Professional Experience

Mr. Burd has worked for SMNG A Ltd. since 2008 and in that time he has become an integral team member on our major educational and health care projects; both new construction and renovations. His roles have ranged from technical detailing, to the authoring of project specifications, construction administration, technical research, and project coordination.

Before coming to SMNG A Tim worked as a project architect for other Chicago firms, where he was involved in the design and construction of a wide variety of projects, including urban residential development, low income housing, loft building conversions, religious facilities and restaurant build-outs. Mr. Burd would frequently participate in the fabrication of complicated architectural design elements and finish installations in order to push the design envelope while maintaining a high quality of built work.

Current Work Assignments

- Project Manager and Construction Administration Services for South Loop Elementary School, a new 1200 student elementary school.

Recent Work Assignments

- Project Manager for CHA Senior Amenities Program: oversight of design-build improvements at seven CHA senior residential mid-rise buildings.
- Project Designer for Parker Residence single-family home: development of construction drawings and technical detailing of exterior envelope of new residence.
- Project Manager for Infant Welfare Society facility renovation: developed and detailed permit and construction drawings, and performed Construction Administration duties through the completion of the project.
- Project Designer for Gage Park Childcare Facility: worked on technical and aesthetic detailing of full building envelope from conceptual stage to construction documents.
